

Linda Qasabian Therapy Website Page

Linda Qasabian is currently a client of mine of whom I am working on creating a new homepage for her. I do not intend to use this project for her website, but I did use her company for my project. I met with her and I am using basics of what she is looking for in a website. She currently has a website, but does not like how it looks and feels it is outdated. I gave her a few options for a color scheme and she chose the color scheme below that fit her wants best.

Requirements:

- 2 Uses of JQuery Effects:
 - o 1. Hide/Show Bar Graph Button
 - o 2. Expand Navigation / Reset Height button
- 2 uses of Canvas HTML Tag:
 - o 1. Home page "Calm.jpg" image
 - o 2. Contact us text canvas
- Real Content / No Lorem Ipsum
 - o Content was taken from her original website with permission: lqasabiantherapy.com
- Animated Bar Chart
 - o On resources page
- Interactive Map
 - o On Contact Page (breaks background color, couldn't figure out why exactly)
- Audio Tag
 - o On Homepage top right
- Fallback content
 - o On audio
 - o Both canvases

Images used:

Calm.jpg:

Linda.jpg

- We had chose a date to retake her headshot, but it had to be rescheduled so I kept her current headshot from her current website.
